PROFILE SUMMARY

An Information Technology student at Politeknik Negeri Batam with a strong interest in full-stack web development. I have experience developing web-based applications through academic and collaborative projects using PHP, Laravel, MySQL, Next.js, and Express.js. I possess strong analytical, problem-solving, and teamwork skills gained through project-based learning and active involvement in campus organizations. Accustomed to working in a collaborative environment, quick to adapt to new technologies, and capable of managing multiple responsibilities under tight deadlines. Possesses a strong desire to learn and is enthusiastic about contributing to the development of digital solutions in a professional setting. Currently seeking an internship opportunity to gain industry experience and further develop technical skills.

PROJECT EXPERIENCE

Venus Cars – Car Marketplace Web Application

2025

Developer Full-Stack | Laravel, MySQL

- Developed a full-stack web application for buying and selling cars using Laravel and MySQL with an MVC architecture
- Implemented vehicle catalog, user authentication, transaction management, and customer dashboard features
- Designed and managed a relational database for storing vehicle and transaction data
- Building responsive and user-friendly interfaces to enhance the user experience across various devices
- Conducting testing, debugging, and feature optimization to improve application performance and stability
- Collaborating with team members in the planning, development, and deployment of projects
- Applying clean coding practices and an organized project development structure

SINOVA – Sistem Informasi Riset dan Inovasi Daerah

2025

Developer Full-Stack | Next.js, Express.js, PostgreSQL

- Develop a web platform for managing and publishing regional research and innovation data
- Build a monitoring dashboard, an innovation management module, and a publication page for Appropriate Technology (AT) products
- Design a REST API architecture that connects the Next.js frontend with the Express.js backend
- Assisting with backend integration, API testing, and data validation using Postman
- Improving workflow efficiency through structured system and database management
- Participating in collaborative discussions, feature planning, and technical troubleshooting
- Contributing to user interface improvements and responsive layout optimization

Sport!4U – Web Application E-Commerce

2024

Developer Full-Stack | PHP, MySQL

- Developed a web-based e-commerce application using PHP and MySQL for shoe sales transactions
- Implemented product catalog, inventory management, user authentication, and transaction history features
- Designed a responsive interface using basic UI/UX principles to enhance user experience
- Performed debugging and troubleshooting to ensure the application's stability and proper functionality
- Assisting with database design and backend feature implementation
- Collaborating with team members to meet project development goals on schedule

ORGANIZATIONAL EXPERIENCE

BADAN EKSEKUTIF MAHASISWA

2025

- Actively contribute to the planning and implementation of work programs and student activities on campus
- Coordinate with committee members to ensure smooth communication and operations
- Develop teamwork, leadership, and organizational management skills through collaborative work
- Manage responsibilities and deadlines within a dynamic organizational environment
- Enhance interpersonal communication and public speaking skills through organizational participation
- Collaborate with students from various departments and majors in coordinating campus activities
